Report of the 12th International Trade Fair for Composite Materials, Technologies and Products

The KOMPOZYT-EXPO® International Trade Fair for Composite Materials, Technologies and Products, a unique event in Central and Eastern Europe, is behind us. The 12th edition of the event, held October 4-5, 2023 at EXPO Krakow, brought together 106 exhibitors and 1,815 visitors. The trade fair was visited by the most important representatives of companies, universities, institutions and clusters, visitors listened to more than 30 expert speeches, and for the first time there was a pavilion of companies from South Korea and Iran.

The KOMPOZYT-EXPO® trade fair is the only meeting in Poland dedicated exclusively to the composite materials and technologies industry. Concentrating the event in one area is particularly valuable for exhibitors, who come to the trade fair with specific goals and offers. The character of the trade fair allows them to reach a very specific audience.

Michał Sobolewski, CEO of FIBRATECH Sp. z o.o., emphasized that the goals of the trade fair are not only to meet and make contacts, but also to present unique solutions – *The KOMPOZYT-EXPO® is definitely a good place to talk to people and businesses from other countries. Our goal in exhibiting here was primarily to establish cooperation and present ourselves to companies from abroad. That's because we are targeting niche market. For us, being here is an opportunity for faster and broader development. Our goal in coming here to the KOMPOZYT-EXPO® was to present a completely new technology, something that is for sure unique not only in Poland, but also in Europe.*

– We are exhibiting at KOMPOZYT-EXPO® for probably the sixth or seventh time, and we are always very satisfied with it – both with the number of visitors and with the service from the trade fair, which is very helpful. What keeps us coming back? The atmosphere and the fact that our customers are here, so we have someone to talk to. It happens that we acquire new contacts here. We are expanding our business into new industries. – Magda Przydział from Krahn Chemie said.

PROGRAM: Expert workshops

PANEL I: Modern composite materials in the reconstruction of Ukraine.

DISCUSSION PANEL: Hydrogen the fuel of the future in an era of energy transformation.

PANEL III: Sustainable circular economy in the composite materials industry.

PANEL IV: Internationalisation.

PROGRAM: Science for Industry Zone

Scientists from universities and research centers had the opportunity to exhibit at a common space – the Science for Industry zone. The following appeared:

AGH University of Science and Technology in Krakow, Bialystok University of Technology, BTU Cottbus-Senftenberg, Krakow University of Technology, Lodz University of Technology, Warsaw University of Technology, Wroclaw University of Science and Technology, Silesian University of Technology and West Pomeranian University of Technology in Szczecin.

PROGRAM: Show Zone

In the Shows Zone, companies gave practical demonstrations and presentations, attracting many interested in their technologies. The Show Zone featured presentations by:

Student Scientific Circle „PRzeTwórcy” at the Faculty of Chemistry of Rzeszow University of Technology and the company Rymatex Sp. z o.o. • EC TEST Systems Sp. z o.o. • Fibratex Sp. z o.o. • CS Kompozyty Sp. z o.o., mPower Sp z o.o. oraz Multichem Sp. z o.o. • Evonik Operations GmbH Sp. z o.o. Oddział w Polsce • OCSIAI Europe • Thornmann Recycling Sp. z o.o. • UBOT Technologies Sp. z o.o. • TECHNOLOGY PARTNERS.
